## *A different type of Parent Support Group*

Project SEA (**S**ocialization, **E**ducation and **A**wareness) is a newly formed California non-profit public charity 501(c)3 Corporation emphasizing the development of community-based programs supporting children and teens with Autism and their families.

Project SEA concentrates on developing programs for the social development of children and teens with Autism, educating family members about the Autism spectrum, and bringing awareness of Autism to the community.

Project SEA's primary focus is to provide a social setting where families can come together and enjoy themselves alongside others who understand and/or live with Autism. Nothing is more soothing than the knowledge that you are not alone. Our objective is to provide a place of acceptance where parents can support each other, share ideas, and simply interact. Project SEA believes these are the cornerstones of a new type of community.

## SOCIALIZATION

Many professionals feel socialization is the key to teaching our children how to thrive within the community. We can work together to help develop the tools our children need to interact with others.

Children and Teens with Autism aren't the only ones who suffer alienation. Sometimes, siblings feel overlooked because of all the attention that is given to the child with special needs. Our goal is not only to educate, but to provide an opportunity for siblings to feel as special as their brother and/or sisters.

## EDUCATION

Project SEA wants to educate others in the community and eliminate the fears that are associated with the word Autism. Project SEA hopes to become a network providing parents and their families with information about where to obtain advice and other resources like books, articles and videos.

## AWARENESS

Project SEA hopes to make community leaders and elected officials aware of Autism through correspondence, internet and community meetings, and events. There are many different people in the community of Autism. Project SEA believes we should all have the opportunity to be heard.

## INFORMATION

I wish to know more about:

- Monthly Events (Los Angeles/Orange County)
- Special Interest Meetings
- Summer Camp Information
- Help with Fundraising
- Socialization Techniques
- Awareness Information for Parents
- Education Material
